

# **Manufacturing solutions for industry**

**Customized manufacturing solutions for injection molding,  
die cast, stamping, fabrication, and CNC machining**

# Welcome to Convenio.

Convenio packages customized manufacturing solutions for injection molding, die cast, stamping, fabrication, and CNC machining.

We work with a select group of expert mold and die builders. Together, we offer decades of manufacturing experience and proven expertise, plus global resources — ready to bolt onto your operations.

## Injection molding, die cast, stamping, fabrication, and CNC machining

Convenio is an ideal partner for companies with solid engineering that need expert manufacturing. We add engineering, feasibility studies, design development, and manufacturability — for a manufacturing solution customized for your program, from launch to production.

We're big enough to handle major programs, but small enough to build working relationships and personalize our customer service.

## Customize your Convenio manufacturing solution

Convenio packages the capabilities of hand-picked companies to manufacture components using injection molding, die cast, stamping, fabrication, and CNC machining processes and tooling.

We customize your manufacturing solution with any or all of these capabilities:

- ✓ Project management
  - ✓ Engineering
  - ✓ Feasibility studies
  - ✓ Design development
- ✓ Manufacturability — verification for design and parts tooling
  - ✓ Manufacturing — support capabilities
- ✓ US, Asian and European manufacturing partners

# The industry experience that goes into Convenio manufacturing solutions

We have decades of design, engineering and manufacturing experience — in injection molding, die cast, stamping, fabrication, and CNC machining.
