

Manufacturing solutions for industry

Customized manufacturing solutions for injection molding, die cast, stamping, fabrication, CNC machining, and thermoforming

CONVENIO
TECHNOLOGIES

Welcome to Convenio.

Convenio packages customized manufacturing solutions for injection molding, die cast, stamping, fabrication, CNC machining, and thermoforming.

We offer decades of manufacturing experience and proven expertise, plus global resources — ready to bolt onto your operations.

Injection molding, die cast, stamping, fabrication, CNC machining, and thermoforming.

Convenio is an ideal partner for companies with solid engineering that need expert manufacturing. We add engineering, feasibility studies, design development, and manufacturability — for a manufacturing solution customized for your program, from launch to production.

We're big enough to handle major programs, but small enough to build working relationships and personalize our customer service.

Customize your Convenio manufacturing solution

Convenio packages the capabilities of hand-picked companies to manufacture components using injection molding, die cast, stamping, fabrication, CNC machining processes and tooling, and thermoforming.

We customize your manufacturing solution with any or all of these capabilities:

- ✓ Project management
 - ✓ Engineering
 - ✓ Feasibility studies
 - ✓ Design development
- ✓ Manufacturability — verification for design and parts tooling
 - ✓ Manufacturing — support capabilities
- ✓ US, Asian and European manufacturing partners

The industry experience that goes into Convenio manufacturing solutions

We have decades of design, engineering and manufacturing experience
— in injection molding, die cast, stamping, fabrication,
CNC machining, and thermoforming.
