

Tooling solutions for industry

Customized tooling solutions for thermoplastics,
thermoset, die cast, and die stamping

FIXTURING | CNC MACHINING | FABRICATION | MANUFACTURING

CONVENIO
TECHNOLOGIES

Welcome to Convenio.

Convenio packages customized tooling solutions for thermoplastics, thermoset, die cast, and die stamping.

We're a select group of expert mold and die builders. Together, we offer decades of tooling experience and proven expertise, plus global resources — ready to bolt onto your operations.

Thermoplastic, thermoset, die cast, and die stamp tooling solutions

Convenio is an ideal partner for companies with solid manufacturing that need expert mold and die builders. We add engineering, feasibility studies, design development, and manufacturability — for a tooling solution customized for your program, from launch to production.

We're big enough to handle major programs, but small enough to build working relationships and personalize our customer service.

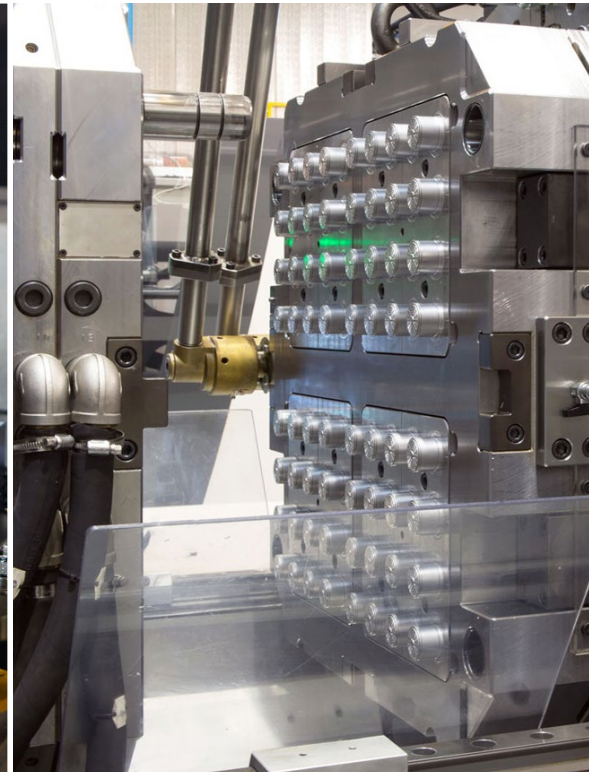

Customize your Convenio tooling solution

Convenio packages the capabilities of select U.S. companies to build thermoplastic, thermoset, die cast, and die stamp tooling.

We customize your tooling solution with any or all of these capabilities:

- ✓ Project management
 - ✓ Engineering
 - ✓ Feasibility studies
 - ✓ Design development
- ✓ Manufacturability — verification for design and parts tooling
 - ✓ Manufacturing — support capabilities
 - ✓ US, Asian, and European manufacturing

The industry experience that goes into Convenio tooling solutions

We have decades of design, engineering and manufacturing experience
— in thermoplastics, thermoset, die cast, and die stamping.
